Education

University of Michigan, Ann Arbor — Expected: May 2021

Bachelor of Science(with honors), Computer Science

Experiences

Databricks Remote, MI — May 2020 - Aug. 2020

Software Engineer Intern Serverless Team

- Developed an efficient recycling mechanism for Spark clusters
- Designed and implemented a framework for zero downtime Spark cluster upgrade based on rolling updates and cluster pools

Software Systems Lab University of Michigan — Nov. 2018 - Now

Research Assistant Advisor: Prof. Mosharaf Chowdhury

- Developing a system for complex, real-time computer vision and natural language processing applications
- Co-Developed a participant selection framework for Federated Learning systems
- Co-developed a general-purpose execution engine, Sol, that can adapt to diverse network conditions on top of Apache Spark.

Disorderly Lab UC Santa Cruz — Mar. 2018 - Sep. 2019

Research Assistant Advisor: Prof. Peter Alvaro

- Co-Developed a debugging approach for distributed systems based on analysis of provenance data obtained during system executions
- Evaluated our approach on the TaxDC collection of real-world bugs from four large-scale distributed systems(Cassandra, Hadoop, HBase and ZooKeeper).

Dropbox San Francisco, CA — May 2019 - Aug. 2019

Software Engineer Intern Filesystem Team

- Worked on the next-generation distributed filesystem for Dropbox
- Designed and implemented an asynchronous system to unmount namespaces that a user loses access to
- Rearchitected our MapReduce framework to be more efficient and fault-tolerant using RocksDB and gRPC

Projects

Distributed Debugger Using Provenance Graph (Go) — Mar. 2018 - Aug. 2018

- Implemented a lineage-driven distributed debugger that can analyze the given program and give suggestions to the programmer how and where to correct the program

Fault-tolerant Scalable Key-Value Store (Python) — Jan. 2018 - Mar. 2018

- Built a distributed, fault-tolerant, highly available and eventually consistent key-value store that can store the amount of data that cannot fit into one single machine.

Skills

- Language: Java, C, C++, Python, Scala, Bash, HTML, CSS, LaTeX
- Tool: Perf, Valgrind, Git, Vim, GDB, Docker, Xcode, Flask, Pytorch
- Data: Oracle, MySQL, Hadoop, Spark, Hive
