

Xiangfeng Zhu

CONTACT INFORMATION	3510 Murdoch Dr. Palo Alto, CA 94306 xzhu27.me	650-660-0918 zxfeng@umich.edu www.linkedin.com/in/xzhu
RESEARCH INTERESTS	Networking, Cloud Computing, Distributed System, Big data	
EDUCATION	University of Michigan, Ann Arbor B.S., Computer Science <ul style="list-style-type: none">GPA: 3.92/4.00 Univeristy of California, Santa Cruz B.S., Computer Science <ul style="list-style-type: none">GPA: 3.94/4.00	Expected: May 2020 Sep. 2016 - June. 2018
RESEARCH EXPERIENCE	Research Assistant Software System Lab, University of Michigan Advisor: Prof. Mosharaf Chowdhury <i>Sol: Fast Distributed Computation Over Slow Networks</i> <ul style="list-style-type: none">Co-developed a general-purpose execution engine, Sol, that can adapt to diverse network conditions on top of Apache Spark.Improved SQL, machine learning, and streaming jobs by 4.2 and 16.4 on average, respectively, in offline and online settings compared to Apache Spark in resource-constrained networks. Undergraduate Researcher Disorderly Lab, UC Santa Cruz Advisor: Prof. Peter Alvaro <i>Protocol Repair Using Lineage Graphs</i> <ul style="list-style-type: none">Developed a debugging approach based on analysis of provenance data obtained during system executions equipped with correctness specifications. Our approaches require programs and their correctness properties written in a high-level declarative language.Helped Design a standalone prototype Debugger Nemo and validated Nemo on protocols from real-world distributed bugs. Our experimental result shows that Nemo demonstrates the promise of automatic provenance-guided debugging for complex distributed protocols. Undergraduate Researcher Computer Communication Research Group, UC Santa Cruz Advisor: Prof. J.J. Garcia-Luna-Aceves <i>CUP: Channel-Utilization Persistence for MAC protocols</i> <ul style="list-style-type: none">Helped Professor J.J. design the first transmission strategy(CUP) for contention-based MAC protocols. This approach applies to any MAC protocols with carrier sensing, virtual carrier sensing, or priority acknowledgments.Analyzed the efficiency of Channel-Utilization Persistence MAC protocols, such as CUP-CSMA and CUP-CSMA/CA, using Markov Chains.Presented numerical results that compare the throughput of CUP-CSMA, non-persistent CSMA, and 1-persistent CSMA.	Dec. 2018 - Now Mar. 2018 - Now Aug. 2017 - Feb. 2018

	Undergraduate Researcher Storage System Research Center, UC Santa Cruz Worked under: Prof. Darrell D. E. Long	Mar. 2017 - Aug. 2017
	<i>Rogue Cell tower(IMSI Catcher) detector</i> <ul style="list-style-type: none"> • Wrote a design document with three lab partners detailing the project and future work. Our approach includes Neighboring Cell Tower Information, Absence of Encryption and Signal Strength. • Designed an algorithm to pinpoint the location of IMSI Catchers based on received signal strength (RSS) • Wrote C code to communicate with a SIMCOM module via AT commands and a GPS module 	
INTERN EXPERIENCE	Software Engineer Intern, Dropbox <i>Filesystem Team</i> <ul style="list-style-type: none"> • Working in Dropbox's Filesystem team as a Software Engineer intern 	May 2019 - Now
PROJECTS	Distributed Debugger Using Provenance Graph 2018 <ul style="list-style-type: none"> • Designed a lineage-driven distributed debugger(Nemo) with graduate students that can analyze the program and give suggestions to the programmer how and where to correct the program Fault-tolerant Scalable Key-Value Store 2018 <ul style="list-style-type: none"> • Developed a distributed, fault-tolerant key-value store that can store the amount of data that cannot fit into one single machine, using consistent hashing. Chess Puzzle Solver 2017 <ul style="list-style-type: none"> • Wrote a program that can determine if a player can force checkmate in up to 5 steps, including the moves of the opponent. Online Reservation system 2017 <ul style="list-style-type: none"> • Designed an online reservation app for Manyue Yoga Stadium, on-line payment system, and on-line community for member to share their experience.
