

## Xiangfeng Zhu

---

CONTACT INFORMATION	3510 Murdoch Dr. Palo Alto, CA 94306 xzhu27.me	650-660-0918 zxfeng@umich.edu www.linkedin.com/in/xzhu
RESEARCH INTERESTS	Networking, Cloud Computing, Distributed System, Operating System	
EDUCATION	<b>University of Michigan, Ann Arbor</b> B.S., Computer Science <ul style="list-style-type: none"><li>GPA: 4.00/4.00</li></ul> <b>Univeristy of California, Santa Cruz</b> B.S., Computer Science <ul style="list-style-type: none"><li>GPA: 3.94/4.00</li></ul>	Expected: May 2020  Sep. 2016 - June. 2018
RESEARCH EXPERIENCE	<b>Research Assistant</b> <b>Software System Lab, University of Michigan</b> <b>Advisor:</b> Prof. Mosharaf Chowdhury <i>Sol: Fast Distributed Computation Over Slow Networks</i> <ul style="list-style-type: none"><li>Co-developing a general-purpose execution engine, Sol, that can adapt to diverse network conditions on top of Apache Spark.</li><li>Improved SQL, machine learning, and streaming jobs by 4.2 and 16.4 on average, respectively, in offline and online settings compared to Apache Spark in resource-constrained networks.</li></ul> <b>Undergraduate Researcher</b> <b>Disorderly Lab, UC Santa Cruz</b> <b>Advisor:</b> Prof. Peter Alvaro <i>Protocol Repair Using Lineage Graphs</i> <ul style="list-style-type: none"><li>Developed a debugging approach based on analysis of provenance data obtained during system executions equipped with correctness specifications. Our approaches require programs and their correctness properties written in a high-level declarative language.</li><li>Helped Design a standalone prototype Debugger Nemo and validated Nemo on protocols from real-world distributed bugs. Our experimental result shows that Nemo demonstrates the promise of automatic provenance-guided debugging for complex distributed protocols.</li></ul> <b>Undergraduate Researcher</b> <b>Computer Communication Research Group, UC Santa Cruz</b> <b>Advisor:</b> Prof. J.J. Garcia-Luna-Aceves <i>CUP: Channel-Utilization Persistence for MAC protocols</i> <ul style="list-style-type: none"><li>Helped Professor J.J. design the first transmission strategy(CUP) for contention-based MAC protocols. This approach applies to any MAC protocols with carrier sensing, virtual carrier sensing, or priority acknowledgments.</li><li>Analyzed the efficiency of Channel-Utilization Persistence MAC protocols, such as CUP-CSMA and CUP-CSMA/CA, using Markov Chains.</li><li>Presented numerical results that compare the throughput of CUP-CSMA, non-persistent CSMA, and 1-persistent CSMA.</li></ul>	Dec. 2018 - Now          Mar. 2018 - Sep. 2018       Aug. 2017 - Feb. 2018

	<b>Undergraduate Researcher</b> <b>Storage System Research Center, UC Santa Cruz</b> <b>Worked under:</b> Prof. Darrell D. E. Long	Mar. 2017 - Aug. 2017
	<i>Rogue Cell tower(IMSI Catcher) detector</i> <ul style="list-style-type: none"> <li>• Wrote a design document with three lab partners detailing the project and future work. Our approach includes Neighboring Cell Tower Information, Absence of Encryption and Signal Strength.</li> <li>• Designed an algorithm to pinpoint the location of IMSI Catchers based on received signal strength (RSS)</li> <li>• Wrote C code to communicate with a SIMCOM module via AT commands and a GPS module</li> </ul>	
INTERN EXPERIENCE	<b>Software Engineer Intern, Dropbox</b> <i>Cloud File System Team</i> <ul style="list-style-type: none"> <li>• Will be working in Dropbox's Cloud File System team as a Software Engineer intern starting May 2019</li> </ul>	May 2019 - Aug. 2019
PROJECTS	<b>Distributed Debugger Using Provenance Graph</b> 2018 <ul style="list-style-type: none"> <li>• Designed a lineage-driven distributed debugger(Nemo) with graduate students that can analyze the program and give suggestions to the programmer how and where to correct the program</li> </ul> <b>Fault-tolerant Scalable Key-Value Store</b> 2018 <ul style="list-style-type: none"> <li>• Developed a distributed, fault-tolerant key-value store that can store the amount of data that cannot fit into one single machine, using consistent hashing.</li> </ul> <b>Chess Puzzle Solver</b> 2017 <ul style="list-style-type: none"> <li>• Wrote a program that can determine if a player can force checkmate in up to 5 steps, including the moves of the opponent.</li> </ul> <b>Online Reservation system</b> 2017 <ul style="list-style-type: none"> <li>• Designed an online reservation app for Manyue Yoga Stadium, on-line payment system, and on-line community for member to share their experience.</li> </ul>
